Hi Tom,

Attached is the updated report we received back from the traffic engineer regarding the parking. After receiving your letter and the memo from Nicholas Mora, Mr. Mora was contacted for clarification.

Attached is also a copy of the the revised report with three things underlined in Blue. They are the only changes which were made:

1. Page one, Last line the words "[Not Existing]" was added to clarify that there currently is not a tenant that requires 34 spaces that is in the building.
2. Page two, line 4, the number "42" was changed to "60" to correct a miscalculation.
3. Page three, the legend under the chart was deleted since it conflicted with the information that existed three lines from the bottom of page one and it was correctly stated on page one

I believe with these changes, we have addressed all of the concerns of the engineer. If anything else is needed, please advise. Hannah and I will be out of the office on Monday and Tuesday in observance of a Jewish holiday.

Regards,

Alan
